

Watsonville Cal.  
April 18, 06.

My dear husband,

I received your letter yesterday from that man and I looked for it Sunday or Monday.

I am sorry to hear that you had a hard time getting in there, & am sorry to hear that you are already homesick for us before you are in there a week, as when you were home you were not with us very much, and I can not tell you when we will be able to come in, as mamma has not written when she will be home.

Tina is now at the sanatorium she has to lay in bed until her fever is gone, and they inject something in her arm & she also.

takes something and they call it  
some treatment, and she asked the  
doctor when she could sit up & he  
said after her fever is gone as she  
has a little yet. + then she could  
sit up only 15 minutes at a time.

But she said the doctor could see  
she was improved in those two  
weeks she rested at home.

I had a letter from Tina herself  
and she said we neednt worry  
about her as she knew the doctor  
would do his best to cure her & she  
was contented there as it was such  
a nice clean place & they had music  
in the front in the evenings for the  
patients graphophone music.
